

A close-up, low-angle shot of a stone mosaic floor. The mosaic is composed of numerous small, rectangular tiles in various shades of brown and tan, arranged in a complex, interlocking pattern. The lighting is warm and directional, coming from the upper left, which creates strong highlights and shadows, emphasizing the texture and three-dimensional quality of the tiles. The perspective is from a low angle, looking down at the floor, which creates a sense of depth and scale.

Stone Mosaic

Lux4home™

Stone Mosaic Lux4homeTM

The variety of shapes and placing on meshes makes collection of stone mosaics of Lux4home really big. Stone mosaics are both used indoors and outdoors, and they always are timeless, and always look spectacular. Stone mosaics Lux4home is dedicated for those he admit natural beauty of stone. They are all smooth and flat, manually polished, but not shiny. Made of onyx, sandstone, marble, and volcano stone are designed with special Interlocking System. You can join them from each side, and make sure no visible joints will ever appear. These stone mosaics are most often placed on walls, and floors. It all depends only on your imagination.

Stones equal heights
