

Natural River Stone Bathtubs Lux4home™

**Lux4home™**

It requires much knowledge and experience to craft a perfect Natural Stone Bathtub. Over the years, Lux4home™ has produced dozens of bathtubs and employed only the best artisans whose skills defined a whole new quality of Indonesian stone products. That is why we are proud to present so many pictures coming straight from the satisfied customers.

Bathtubs from our stock

In case of the River Stone bathtubs, it needs to be noted that every stone is different and unique in shape and size. We are happy to follow client's requirements and, thanks to the wide access to Indonesian stone resources, we can get very close to the desired colour and dimensions. We just use what the nature gives us, but isn't it what makes these products beautiful?

You will not find these bathtubs anywhere else than in Lux4home™ manufacture.

Why the key clients decide to choose a stone bathtub just from Lux4home™:

- Drain hole is always made appropriately, it is no longer a weak point of a stone bathtub.
- The surface finish is done meticulously, without use of any paint.
- Appropriate and safe wall thickness.
- Each bathtub is well secured for long run transport.
- Our products were awarded many times for their quality, and it is certified that they meet the standards to be skin-safe and food safe.

You can choose: where the drain holes is, size/weight of the bathtub, transport method, stone shade. Before shipping, we always deliver the pictures of the product for acceptance.
